46. (New) The method of claim 12 further comprising the step of:
using bi-directional electronic mail interaction between authorized
individuals and the information modules.

47. (New) The method of claim 46 further comprising the step of:
providing an electronic mail response capability for at least certain of the
requests and notifications issued in any of the information modules allowing an
authorized user to respond to the request and notification by direct electronic mail reply;
and

the information modules automatically documenting the reply and any
documents attached to the reply in the appropriate information module by updating the
conformation in the appropriate information module.

48. (New) The method of claim 47 further comprising the step of:
providing an electronic notepad for each authorized individual to make
personal notes about any item of information in the network relating to the project, and
attaching the personal notes to the items of information for use only by the authorized
individual.

49. (New) The method of claim 14 further comprising the step of:
using bi-directional electronic mail interaction between authorized
individuals and the information modules.

50. (New) The method of claim 49 further comprising the step of:
providing an electronic mail response capability for at least certain of the
requests and notifications issued in any of the information modules allowing an
